## *Introducing a new generation in Viessmann Hydronic Heating*

### *Viessmann Airflow**PLUS***

*With changing climates and a growing demand for both heating and cooling, the Viessmann Airflow**PLUS** offers maximum comfort and efficiency to any home all year round.*

*The Viessmann Airflow**PLUS** is designed to work in combination with a Viessmann boiler to provide forced air heating and cooling, and the ability to combine the comfort of hydronic heating all in one convenient package. Experience the best of both worlds; forced air to some parts of the home and hydronic heating to others.*

*Featuring a fully insulated cabinet, top-quality ECM fan blower, wide modulation range, operating and diagnostic LED display and integrated control sensors, the Viessmann Airflow**PLUS** provides nothing but efficient, comfortable conditioned air day after day.*

*The Viessmann Airflow**PLUS** uses micro-processor control technology for maximum comfort by providing warm or cool comfortable conditioned air with the quietest of operations. The integrated control logic provides efficient management of multistage heating and cooling systems which allows for greater energy savings, reduced utility bills and a healthier indoor environment.*

*For ease of service and maintenance, all components slide out on rails and with built-in carrying handles, the unit is easily transported in utility rooms. The versatile design allows the Viessmann Airflow**PLUS** to be installed in an upflow, downflow, or horizontal configuration to suit your particular application.*

*Ideal for both retrofit and new construction applications the Viessmann Airflow**PLUS** gives you more heating and cooling options than ever before from Viessmann.*
